

APPLYING ICER ASSESSMENTS IN NEVADA COULD LIMIT PATIENTS' ACCESS TO MEDICINES

If Nevada Medicaid relied on one-size-fits-all value assessments like those conducted by the Institute for Clinical and Economic Review (ICER), it could put patient access to medicines in jeopardy, including for diseases like cancer and multiple sclerosis.

6,202 prescriptions per year could face restrictions if Nevada's Medicaid program used an ICER-like standard

PRESCRIPTIONS THAT MAY BE SUBJECT TO ACCESS RESTRICTIONS UNDER AN ICER-BASED FORMULARY IN NEVADA'S MEDICAID PROGRAM

Xcenda. "Impact analysis of ICER-based formulary implementation in Medicaid." December 2020.

19%
of Nevadans are covered
by Medicaid and CHIP

1 in 3
Nevadans with disabilities receive their health care
coverage through Medicaid

Kaiser Family Foundation. "Medicaid in Nevada." October 2019

Methodology and Limitations: Patient-level detail (e.g., number of beneficiaries, diagnoses, patients using more than one prescription) was not provided; therefore, utilization was assessed per product and not per product and indication over one calendar year (2019). Differences in how medicines may be covered in different Medicaid plans and what access restrictions may exist were not accounted for. This work was done on behalf of PhRMA. Xcenda maintained control over methodology and editorial content.
