

The CAREs Grant Program

The COVID-19 pandemic deepened health disparities, including the gap in average life expectancy and outcomes for many chronic diseases across race, gender, and geographic location. But, health disparities have deep roots in the U.S. where it is well documented that communities of color have a higher prevalence of preventable, chronic diseaseⁱ and tend to be diagnosed and treated later than white Americans.^{ii, iii, iv}

PhRMA believes that diversity, equity, and inclusion are essential to the discovery of new medicines and that people of all ethnic and racial backgrounds should have equitable access to treatment.^v We are committed to addressing the many interwoven social determinants of health that allow health inequities to arise and persist.^{vi} Moreover, we believe addressing inequities requires connecting with and learning from affected communities directly.

Recognizing that each community faces unique barriers, PhRMA established the Collaborative Actions to Reach Equity (CAREs) grant program in April 2020. The CAREs grant program aims to support community-centered solutions to address health inequities through partnership with community-led organizations. These awards support local and national activities and research to drive meaningful change on the ground to advance health equity. The CAREs grant program not only supports the efforts of grantees to advance equity, it also helps support the identification of community-led best practices toward scalable, practical interventions that can be applied to other communities, disease states, or public health concerns to advance health equity.

CAREs Grant Recipient for Georgia

NAESM COVID-19 Outreach Project

NAESM, Inc. in Atlanta, Georgia

NAESM is a nonprofit community-based safety net provider with more than 30 years of commitment to providing health services, particularly for HIV, to Black gay/bi/same gender loving men and women of transgender experience in the Metro Atlanta area. NAESM proposes a large-scale communications campaign utilizing social media programming, street and community outreach, and information provided at its national conference to address vaccine hesitancy in the Black gay/bi/same gender loving and the Black transgender communities in the metro Atlanta area and nation-wide.
