

APPLYING ICER ASSESSMENTS IN CONNECTICUT COULD LIMIT PATIENTS' ACCESS TO MEDICINES

If HUSKY Health—Connecticut's Medicaid program—relied on one-size-fits-all value assessments like those conducted by the Institute for Clinical and Economic Review (ICER), it could put patient access to medicines in jeopardy, including for diseases like cancer and multiple sclerosis.

10,316 prescriptions per year could face restrictions if HUSKY Health used an ICER-like standard

PRESCRIPTIONS THAT MAY BE SUBJECT TO ACCESS RESTRICTIONS UNDER AN ICER-BASED FORMULARY IN HUSKY HEALTH

Xcenda. "Impact analysis of ICER-based formulary implementation in Medicaid." December 2020.

Connecticuturs with disabilities receive their health care coverage through Medicaid

Kaiser Family Foundation. "Medicaid in Connecticut." October 2019.

Methodology and Limitations: Patient-level detail (e.g., number of beneficiaries, diagnoses, patients using more than one prescription) was not provided; therefore, utilization was assessed per product and not per product and indication over one calendar year (2019). Differences in how medicines may be covered in different Medicaid plans and what access restrictions may exist were not accounted for. This work was done on behalf of PhRMA. Xcenda maintained control over methodology and editorial content.
