

HR 3 Threatens Patient Access to Treatments

The Lower Drug Costs Now Act would set U.S. prices for medicines based on the pricing policies of six foreign governments that restrict patient access to medicines.

	 United States	 Australia	 Canada	 France	 Germany	 Japan	 United Kingdom
 Of the 408 new medicines approved globally since 2011, what percentage are available?	86%	38%	47%	48%	64%	52%	60%
