

Our Commitment to *Beat* Coronavirus

In these unprecedented times, America's biopharmaceutical companies are coming together to achieve one shared goal: the eradication of COVID-19. The decades-long investments we made in new technology, research and treatments have prepared us to act swiftly:

- **We are rapidly screening our vast global libraries of medicines to identify potential treatments and have numerous clinical trials underway to test new and existing therapies**
- **We are dedicating our top scientists and using our investments in new technologies to speed the development of safe and effective vaccines**
- **We are sharing the learnings from clinical trials in real time with governments and other companies to advance the development of additional therapies**
- **We are expanding our unique manufacturing capabilities and sharing available capacity to ramp up production once a successful medicine or vaccine is developed**
- **We are collaborating with government agencies, hospitals, doctors and others to donate supplies and medicines to help those affected around the world**
- **We are working with governments and insurers to ensure that when new treatments and vaccines are approved they will be available and affordable for patients**

We all have unique roles to play and are confident that together we can be successful. And we won't rest until we are.
